survive her resentment.

and they do not like it.

TAKES IT AS A PERSONAL IN-

A VIRGINIA VETO.

We regret to learn that Governor Number has seen fit to veto the bill recently passed by the Virginia Legislature amending the charter of the city of Petersburg. There is no allefundamental principles upon which, in the opinion of Governor Kemper. the institutions of Virginia are based. Governor Kemper thinks also that the proposed amendment was "irrexpedient," for the reason that it tended to "disturb the growing confidence between both races and sections.

How far and in what way the proposed amendment to the charter of the city of Petersburg was calculated to interfere with amicable relations between black and white and North and South, we know not, but this we do know, that no Radical Governor within our recollection has ever withheld his hand because a law tended to the injury of the white race. We presume, of course, that the gist of Governor Kemper's objection is that the amendment to the Petersburg charter will operate unequality and unjustly upon the negro race.

The last evidence of the "growing confidence" between the two races in Petersburg that we recall just now, was exhibited, if we mistake not, just prior to the late election, at which General Kemper was elected Governor, when a procession of negroes murched through the streets throwing stones and other missiles and making such hostile demgot ready for action.

We greatly fear the action of Governor Kemper will prove a sad blow to the good people of Petersburg, for at every fresh evidence of their thieves. All needful sampling, weighther heal set their bears many the they had set their hearts upon the villainy, cried out, "Well done good ing, compressing, mending, etc., are to who infest the city and who find it a am ndment.

A MINT TO GRANGERS

funding the tax on lint cotton and it is now about time for some definite action to be taken by Congress towards righting one of the greatest injuries ever done to our people.

The cotton tax was collected on four crops, including that grown in the year 1865 and the stock on hand at the was three cents per pound, making about twelve dollars per bale. In 1868 the tax was reduced to two and a half cents per pound or ten dollars per bale of four hundred pounds.

The average annual crop of North Carolina does not fall short of 140,000 bales; so that the amount of tax collected from the cotton planters in our own State alone was over six millions of dollars.

money, or the half of it is about to be returned to the farmers of the Old North State, it is certainly a cause for great rejoicing. That it ought to be well dispute, it being now unanimously admitted that the tax was not only
